*Dimensions measured in inches

Flexible Couplings are designed to be used with FanAm's polypropylene blowers.

No glue, welding, soldering, gaskets, or other materials are needed-just slip the pipe and fan inlet/outlet into the coupling and tighten the bands to 60 inch pounds.

Their unparalleled flexibility allows them to compensate for pipe misalignment while still providing a tight seal.

When properly installed, flexible pipe couplings can simplify installation, reduce noise transmission through pipes, increase pipeline flexibility, and greatly reduce assembly time and labor costs.
